**2. Citations and explanations (Rule 70.7)****1 Claim 1**

1.1 Document WO-A-02/082235 (D1) discloses a method for processing graphic information on items of mail, wherein the graphic information is detected, evaluated and stored, and wherein the detected graphic information is used for physically sorting mail items, wherein depending on the first result of the graphic information evaluation a database is updated with additional sorting features, wherein the video data of the surface contained in the graphic information are stored, and wherein in addition, on the basis of the updated database, a second result of the analysis is determined and the first item of mail undergoes further physical sorting.

1.2 The subject matter of independent claim 1 therefore differs from this known method in that, depending on the analysis results, the graphic information of a first mail item is sorted, and by the sorting of the graphic information of the first mail item a physical sorting of a second

mail item is triggered.

1.3 A procedure of this kind is not known from or suggested to a person skilled in the art by the prior art, and therefore the subject matter of claim 1 meets the requirements of PCT Article 33(2) and (3).

2 Claim 28

2.1 The subject matter of independent device claim 28 differs from the prior art at least by virtue of the device features corresponding to the distinguishing method features, that is to say, a means for bringing about the physical sorting of a second mail item as a result of the first result of the analysis of the graphic information of a first mail item, with which a database is updated.

2.2 A procedure of this kind is not known from or suggested to a person skilled in the art by the prior art, and therefore the subject matter of claim 28 satisfies the requirements of PCT Article 33(2) and (3).

3 Claims 2-27 and 29-33

3.1 These dependent claims contain embodiments of the subject matter of claims 1 and 28. Consequently, they satisfy the requirements of PCT Article 33(2) and (3).

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

- 4 The subject matter of independent claims 1 and 28 does not satisfy the requirements of PCT Article 6, for the following reasons:

Claim 28 appears to contain device features essential to the invention, which are not reflected in the corresponding method claim 1. This concerns in particular the means for recognising different ways of paying for the mail items, wherein both the image processing units and the means for recognizing the different payment possibility are disposed in a data network.
